PROFESSIONAL SUMMARY

22 years old fourth year BS Information Technology student specializing in Business Informatics, seeking a Data Engineer OJT opportunity. Hands on experience in backend development, database management, application deployment, and frontend UI/UX contributions. Builds projects using JavaScript, Node.js, Express, MongoDB Atlas, SQL Server, and Python, with an interest in data pipelines, ETL workflows, and transforming data into reliable datasets.

TECHNICAL SKILLS

Programming: JavaScript, Python
Backend Development: Node.js, Express.js, REST API development
Frontend Development: HTML, CSS, JavaScript, UI/UX implementation
Databases: MongoDB Atlas, Microsoft SQL Server, MySQL
Data Engineering: ETL fundamentals, data ingestion, data cleansing, data transformation, data integration, dimensional modeling, Star Schema
Tools: Git, GitHub, SQL Server Management Studio (SSMS), Draw.io, VS Code, Pyodide, AWS

PROJECTS

Sales Data Warehouse | *SQL Server, T-SQL, CSV, Draw.io*
- Built a SQL Server data warehouse integrating CRM and ERP source data through Bronze, Silver, and Gold layers.
- Implemented SQL based data ingestion, cleansing, standardization, integration, and data quality checks.
- Designed Gold layer fact and dimension views using a Star Schema and documented the architecture, data lineage, and table relationships.

BLIMS – Bolosan Elementary School Management System | *Node.js, Express, MongoDB, HTML, CSS, JavaScript*
- Independently handled backend development, including server-side functionality and application logic.
- Managed the database implementation and independently handled the application's deployment and online hosting.
- Contributed to frontend UI/UX implementation to support a clear and usable interface.

FleetFlow – Delivery & Logistics Management System | *Node.js, Express, JavaScript, HTML, CSS, MongoDB Atlas*
- Developed application functionality using Node.js and Express, with MongoDB Atlas for database storage.
- Worked on frontend pages and interface implementation using HTML, CSS, and JavaScript.

CleanSheet – Data Cleaning Workspace | *HTML, CSS, JavaScript, Pyodide, Python*
- Built a browser-based workspace for uploading and inspecting CSV/XLSX datasets and reviewing data quality information.
- Integrated Pyodide to run Python-based data processing in the browser and support dataset-cleaning workflows.

EDUCATION

PHINMA University of Pangasinan | Pangasinan, Philippines
Bachelor of Science in Information Technology – Business Informatics
Fourth-year student

ADDITIONAL INFORMATION

Target Opportunity: Data Engineer Internship / On the Job Training (OJT)
